

TESTIMONIALS:

Teresa,
I can't thank you enough for developing and manufacturing your amazing HÉLAN product. I just completed six weeks of radiation treatment, going five days a week, for a total of 30 treatments. The doctors, nurses and technicians are truly amazed by how well my skin has held up. There was one small area that I didn't know was being treated with the radiation, and so I didn't apply HÉLAN there. That area became burnt and extremely painful. But it's a testament to how well HÉLAN works and how much pain and skin damage I've been able to avoid.

To: Teresa Wolfe

A troublesome toe blister-come-corn of a year finally burst, then reformed-burst-reformed for a few days, then became infected. A Band-Aid application over a dab of HÉLAN overnight and the following morning took care of the problem, and there is no visual or sensual evidence that there had ever been a problem! An amazing result.

Hi t!
12/2/15
Thanks for getting chest out to me so quickly.
I used it on my nose last night (was dry & bleeding) & it felt totally healed in the morning!
This has been going on for months so to get relief is amazing.
Thanks!
Kim

At last with HÉLAN I have a natural and wonderful remedy for relieving the itch of insect bites and healing wounds rapidly. It is better than anything else I've tried in my many years of living and I have yet to explore its other uses.

Thank you Teresa.

At the end of last year, I had a complete shoulder replacement which required a substantial incision. After surgery, I remember seeing post-surgical wounds listed on your container as one of HÉLAN uses. As soon as I was able, I started using HÉLAN on a daily basis with wonderful results. After several months, my surgical incision has practically disappeared without any scarring, just a smooth soft line. I highly recommend HÉLAN to help repair / heal post-surgical wounds. J.D.M.

Teresa,
Yes, I did sample the HÉLAN. A patient with eczema used it and reported good results with use (though if discontinued, the eczema did slowly return). Another patient did also use it with a child who had diaper rash and subsequent dry skin from the alcohol found in the wipes, and she reported that the child's skin returned to normal after one use. She continues to use as needed. Finally, I used it on myself as I have an elbow that continually has dry, chapped skin. I too found the salve to work better than most lotions. While the dryness returned if discontinued, it took far longer and was not nearly as bad.

I think the product is quite good and would do well selling in a holistic or naturopathic practice as well as perhaps in the offices of dermatologists.
Let me know how I can help.

Dr. Robert D. Argyelan

I have used HÉLAN for rough, abrasive, or broken skin... like cuts, little skin outbreaks, wounds, or areas that are trying to heal over. I use it on my cuticles and around my fingers, a lot on my hands when they are dry. As a lip balm, for diaper rash, for vaginal soreness or fragile skin in that area. Around my eyes, where there are wrinkles forming. At the edge of my nose when I have a cold and it is irritated. On the front of my neck, under my chin. On my elbows. A lot on my feet. I keep a little jar in several places in the house as well as in my car and in my purse. I never travel without it.

HÉLAN (pronounced 'Hē lan):

An all-natural, non-toxic ointment made from herbs long known to stimulate healing and the re-growth of healthy skin. Uniquely formulated with Plantain*, Comfrey*, Yarrow*, Chamomile*, and St. John's Wort* extracted in Extra Virgin Olive Oil and beeswax. HÉLAN is deliberately unscented, though there is a little scent inherent in the ingredients. It has a green tint from the chlorophyll extracted from the plants, but goes on colorless. The product is food grade, so can be used on oral surfaces.

**organic or wildcrafted*

USES FOR HÉLAN:

- Promotes Healthy Skin Formation
- Relieves Pain / Itching
- Moisturizes
- Protects Skin
- Doesn't Sting
